

# Boggabri Public School

Year 5 & 6 Home Learning - Week 10

Hello Everyone!

Here is your learning booklet for the week. I hope you are all safe and well. It was so good to see you on zoom. I hope to see more of you this week, so keep an eye out for the text message invite. Make sure you call me if you need help with any of your work 😊

### Spelling and Reading

You have your soundwaves tasks plus some activities to do using your list words. The sound this week is oo u. Remember when writing your list words in the segmenting boxes, if two or more letters make one sound, write them in the one box.

Year 6 – You will need the following information on compound verbs to complete one of your activities.

The words *could have*, *should have* and *would have* form **compound verbs**.

For example:

He **could have** come with us.

The word *of* is a **preposition**. It introduces phrases.

For example:

a bag **of** lollies

It does not form compound verbs with *could*, *would* or *should*.

For example:

I **could have** gone

not

I **could of** gone

You will also need to know about Spoonerisms.

**Spoonerisms** occur when the beginnings of two words are swapped around accidentally.

For example:

boy tox for toy box

Some of your reading group activities are also included. Feel free to use Epic! to find a book that you would like to read. Have a go at doing vocabulary activities using your book.

**1** Go to [www.getepic.com/students](http://www.getepic.com/students)

**2** Enter class code

**3** Select their name  
[View and edit class roster](#)

### Writing

You will also find two narrative writing tasks. Remember to follow the structure:

The first task requires you to write from the dog's perspective – some of you will be happy to hear this!

The second task asks you to describe a dream. You will need to use your senses to make the reader feel as though they are there and use descriptive language including adjectives and adverbs.

### Grammar Lesson – Nominalisation

You will need to draw on your prior knowledge to change words from verbs to nouns. The purpose of nominalisation is to use a formal voice in your writing. It is not used in narrative writing.

Watch these videos to find out about nominalisation:

<https://www.youtube.com/watch?v=HeqfsoAwVAE>

[https://www.youtube.com/watch?v=9YM7x\\_1-pA](https://www.youtube.com/watch?v=9YM7x_1-pA)

There are some PowerPoint slides attached to help you understand nominalisation. Write your answers for the questions on the slides.

There is also a worksheet to complete. If you are finding any of these tricky, try changing the verb in each sentence to a noun before you try to write it in a sentence.

### Maths

This week you will be working with fractions again. Some of the slides that are printed out require you to colour the fraction bars or write answers on the slides.

If you don't remember how to work out equivalent fractions, look at this video to refresh your memory as it will help when adding and subtracting fractions. <https://www.youtube.com/watch?v=qcHHhd6HizI>

Simplifying fractions <https://www.youtube.com/watch?v=4xFwkDSMVw4>

Adding fractions with a common denominator - <https://www.youtube.com/watch?v=mO53rHElQr4>

Adding and subtracting fractions without a common denominator -  
<https://www.youtube.com/watch?v=xNsyNwAkqfk>

There is one set of slides (the last set) and worksheets that are aimed for Year 6. If you are feeling confident you can attempt this set too.

You can also complete the number of the day activities by clicking on the link or putting it into your search bar  
<https://mathsstarters.net/numoftheday/4digit>

### **History/English Study**

There are some information pages and links available to help you with your learning in History/English Study.

#### **Activity 1:**

Watch the video of Ahn Do's book 'The Little Refugee' <https://www.youtube.com/watch?v=N7Le1tycCKA> this is his version of coming to Australia as a refugee. This will help you complete the history worksheet task.

#### **Activity 2:**

Using the knowledge you gained last week and the Ahn Do book 'The Little Refugee', answer the following questions. Write a paragraph each expressing your opinion.

- What was life like in Vietnam for Anh's family? What words are used to describe this place?
- Why did Anh's family need to leave Vietnam?
- What was the experience for the family on the boat on the way to Australia?
- What was it like when Anh first came to Australia? How do we know how he felt?
- What changed things for Anh?
- Is this a children's book?

### **Science**

Mrs Watt has also provided a science-based lesson for you to complete.

Have fun and stay safe!

Mrs Stove 😊

# Unit 27

oo u

book bush

## List Words

soot  
sugar  
woollen  
woolly  
wolf  
couldn't  
would've  
shouldn't  
crooked  
fully  
bully  
pulley  
bullet  
bullock  
fullness  
womanly  
pudding  
butcher  
driftwood  
barefoot  
bulldozer  
understood  
knighthood  
cushion  
kookaburra

- 1 **Colour** the graphemes that represent  in the List Words.
- 2 **Go** to the List Words for Unit 27. **Count** the sounds and identify all the graphemes in each List Word.
- 3 **Write** any other letters that can represent  on the Grapheme Chart. **Write** one word example for each.
- 4 **Colour** the blocks containing words where you hear  *green*, to find a path out of the maze.

## Grapheme Chart

grapheme	word

measure	sure	sugar	could	would	wood	should	shook	bullet	bullock
butter	force	fully	through	tooth	golf	kitchen	loose	women	brought
honour	knighthood	adult				crooked	pudding	encouragement	
guardian	woman	column				custom	woollen	understood	but
huge	pure	barefoot	wholly	humorous	troubled	bulldozer	dull		
suggest	gulf	woolly	bully	wolves	pulley	womanly	kookaburra	cold	

- 5 **Write** List Words that include these graphemes to fit on the lines.

\_ u \_ \_ \_ \_ \_ u \_ \_ \_ \_ \_ u \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_ u \_ \_ \_ \_ \_ u \_ \_ \_ \_ \_  
 \_ \_ oo \_ \_ \_ \_ \_ u \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_  
 \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_ oul \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_ oo \_ \_ \_ \_ \_

- 6 **Rewrite** these contractions, inserting the apostrophes.

wouldn't \_\_\_\_\_ should've \_\_\_\_\_ couldn't \_\_\_\_\_  
 where's \_\_\_\_\_ there'll \_\_\_\_\_ you're \_\_\_\_\_

- 7 **Write** the words that formed these contractions.

**Rewrite** the sentence changing the contractions back to pairs of words.

I'd \_\_\_\_\_ I'd \_\_\_\_\_ who's \_\_\_\_\_ who's \_\_\_\_\_  
 would've \_\_\_\_\_ shouldn't \_\_\_\_\_  
 I'd have gone swimming but I'd been sick and it could've made me sick again.

- 8 **Write** the homographs represented by the sound boxes.

**Rewrite** the words in the sentences, with their numbers to show where the different pronunciations fit.

The leader \_\_\_\_\_ ( ) his little finger as a signal for his team to follow him along the footpath.  
 At first the track was fairly straight. It became quite \_\_\_\_\_ ( ) as it wound in amongst the trees.

9 **Unjumble** the plural forms of words from List Word families.

dgsinpdu \_\_\_\_\_ abeeefrt \_\_\_\_\_ elovsw \_\_\_\_\_ lbelisu \_\_\_\_\_  
 cihnossu \_\_\_\_\_ yuspille \_\_\_\_\_ emnow \_\_\_\_\_ bdelorsuzl \_\_\_\_\_

10 **Read** the dictionary entry for the word *butcher*. **Answer** the questions.

Go to Activity 10 page 25.

- What are the guide words for the page? \_\_\_\_\_, \_\_\_\_\_
- What is the headword? \_\_\_\_\_
- The letters in the brackets beside the headword tell you how to \_\_\_\_\_ the headword.
- What letters has this dictionary used to represent **ch** and **er**?
- How many meanings are given for the headword as a noun \_\_\_\_\_, as a verb, \_\_\_\_\_?
- What words can be built from the headword?

bush	butter
<b>butcher</b> (say buch-uh) noun	
1. someone who prepares and sells meat	
2. someone who kills animals for food	
<b>butcher</b> verb	
3. to kill animals for food	
4. to make a mess of something: to <i>butcher</i> a job	
<b>Word building:</b> <i>butchery</i> (noun) <i>butchered, butchering</i> (verbs)	
<b>Word History:</b> from French <i>boc</i> meaning <i>buck</i>	

- From which language did this word originate? \_\_\_\_\_
- Read the following sentences. Write a number from 1 to 4 to show which of the above meanings the sentences use for the word **butcher**.
  - When Mum asked me to ice the cake I tried not to butcher the job. \_\_\_\_\_
  - Dad works at the meat works where his job is to butcher animals for food. \_\_\_\_\_
  - Our butcher is a very friendly man who sells us very good quality meat. \_\_\_\_\_
  - My uncle works as a butcher at the meat works where he kills animals for food. \_\_\_\_\_

## Challenge

**Combine** one word from each list, to make compound words. **Write** them in the Word Puzzle to find the vertically hidden compound word.

- |           |         |
|-----------|---------|
| 1. under  | wool    |
| 2. wolf   | wood    |
| 3. bull   | cushion |
| 4. police | stood   |
| 5. drift  | dozer   |
| 6. pin    | hound   |
| 7. lambs  | frog    |
| 8. wood   | woman   |
| 9. bull   | wind    |

## Word Chain — a game for 2 to 4 students.

- 1 Students are dealt three cards each. The rest of the cards form a pick-up pile.
- 2 The first student places a card face up in the centre.
- 3 The next student joins on one of their cards to complete a **List Word**. If the student is unable to complete a word, they take a card from the pick-up pile.
- 4 When the pick-up pile finishes, any student who cannot complete a word misses a turn.
- 5 The first student to use all of their cards is the winner.

knighthood

**Alphabetical Order** — a game for 2 to 4 students.

Students sit in a circle. Each student is dealt six cards face down. The students arrange their cards inside *Sound Waves 5*, which is turned sideways on the floor with the cover held up, to hide them from the other students.

The remaining cards form a stack in the centre with one card turned face up beside it to start a discard pile. The aim is to collect six cards with words in consecutive alphabetical order of the first letters only, eg **b, c, d, e, f, g** or **n, o, p, q, r, s** but not **n, m, ou, ov, p, q** where two words start with the same letter.

- 1 The first student picks up a card from either the stack or the discard pile and discards one card face up on the discard pile.
- 2 The second student can pick from the stack or discard pile and then discards one card face up on the discard pile.
- 3 Play continues around the circle. When the stack finishes, turn the discard pile over to form a new stack. The card being discarded at the time goes face up to start the discard pile.
- 4 The winner is the first to have six words in alphabetical order.
- 5 Others can keep playing until at least three students have formed sets of six words in alphabetical order.

8 **Study** the information in the green text. **Cross out** the incorrect word in each underlined verb. **Write** the full correct verb at the end of the sentence.

★ The words *should*, *could* and *would* are verbs and can be used with the helping verb *have*, for example *He could have come with us*. The word *of* is a preposition that introduces phrases, for example *She picked a bunch of roses*. *Of* is never a verb.

The experiment using pulleys and levers should of worked.

The penguins' rookery would of disappeared in the cyclone.

That whoosh of wind could of blown the courier off his bike.

- 9 **Colour code** one word part from each column to form spoonerisms.  
Write the original words on the lines. Some are compound words.

Go to Helpful Hints 29 and 31

dull	boarer	_____	fare	knood	_____	budding	pike	_____
tull	banger	_____	fussy	poot	_____	cin	powl	_____
rush	bozer	_____	hight	hink	_____	bush	backer	_____
rull	fime	_____	wood	boot	_____	whush	pushion	_____

- 10 Write the List Words that could appear between the following pairs of guide words on the pages of a dictionary.

★ Guide words are the words at the top of the pages in a dictionary, to guide you to the word you are seeking.

amber	pug	full	cube	wool	babble
_____	_____	_____	_____	_____	_____
amenity	pulse	function	cuff	word	baby

- 11 Write List Words to complete these sentences. Use a dictionary to help with meanings.

The \_\_\_\_\_ misunderstood where he was to deliver the crate of gold \_\_\_\_\_.

The \_\_\_\_\_s danced \_\_\_\_\_ly around the campfire after finding gold.

The bushrangers hid among the \_\_\_\_\_es by the billabong before they \_\_\_\_\_ the coaches carrying the gold bullion from the gold fields.

A man showed us how to use a \_\_\_\_\_ to launch a spear and how to throw a boomerang.

My Russian aunt sent me a \_\_\_\_\_ to wear on my head as part of my fancy dress costume.

A \_\_\_\_\_ was printed and handed out to alert people about the approaching bushfire.

The success we achieved in completing the rookery for the cuckoos was very \_\_\_\_\_.

In the past, the \_\_\_\_\_ was used as a measurement for large quantities of goods such as grain.

## Challenge

**Colour** all the List Words in the Word Search to find the hidden title of a book. Letters forming words can be joined in any direction except diagonally. No letter is shared by words. One word is done as an example.

★ Link the words lightly with a lead pencil until all words are found.

Hidden Book Title \_\_\_\_\_

**Unlucky Last** — a game for 2 to 4 students.

The aim of the game is to dispose of all cards as quickly as possible by laying out sets of three cards with words starting with the same letter arranged in alphabetical order and not be left holding the Unlucky Last card.

- 1 Students sit in a circle.
- 2 The dealer deals out all the cards. One student will get one more or one less card, depending on the number of students.
- 3 All students put out, face up, any sets of two or three cards with words following the desired pattern and hold the rest of their cards in their hands.
- 4 The dealer then picks a card, without looking, from the hand of the student to their right and adds it to any of their pairs to form a set of three if they can. If they can't they add the card to their hand.
- 5 The next student does the same, selecting a card from the student to their right and adding to any of their pairs where possible.
- 6 Play continues, with students dropping out as they dispose of all their cards, until all sets of three cards have been formed.
- 7 The student who is left with the Unlucky Last card loses the game.

# BLM WSS Word Strip Sheet

[illegible]

# What Is Nominalisation?

Nominalisation occurs when you use a verb, adjective or adverb like a noun. You do this by changing the word, often by adding a suffix.

Verb into  
a noun:

I organised my pencil case.  
**My pencil case is in perfect organisation.**

Adjective into  
a noun:

The TV show was entertaining.  
**The TV show had enjoyable entertainment.**

Adverb into  
a noun:

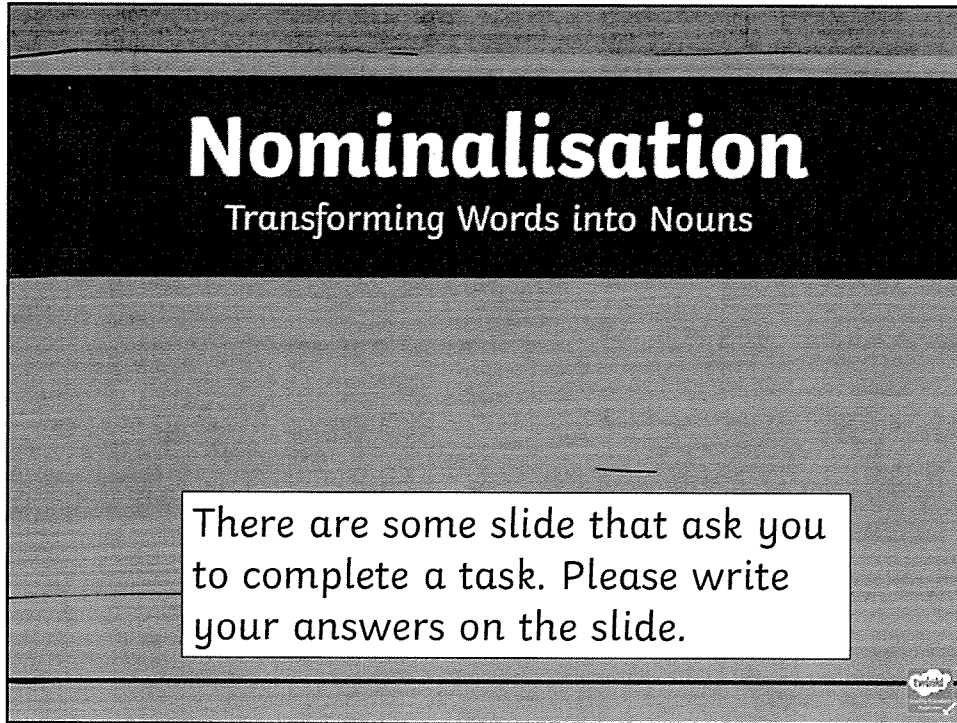

My friend ran quickly.  
**My friend moved with quickness.**

**Nominalisations can make your writing sound more formal and precise, but can also distance or bore your readers. Be wary and use your nominalisations wisely!**

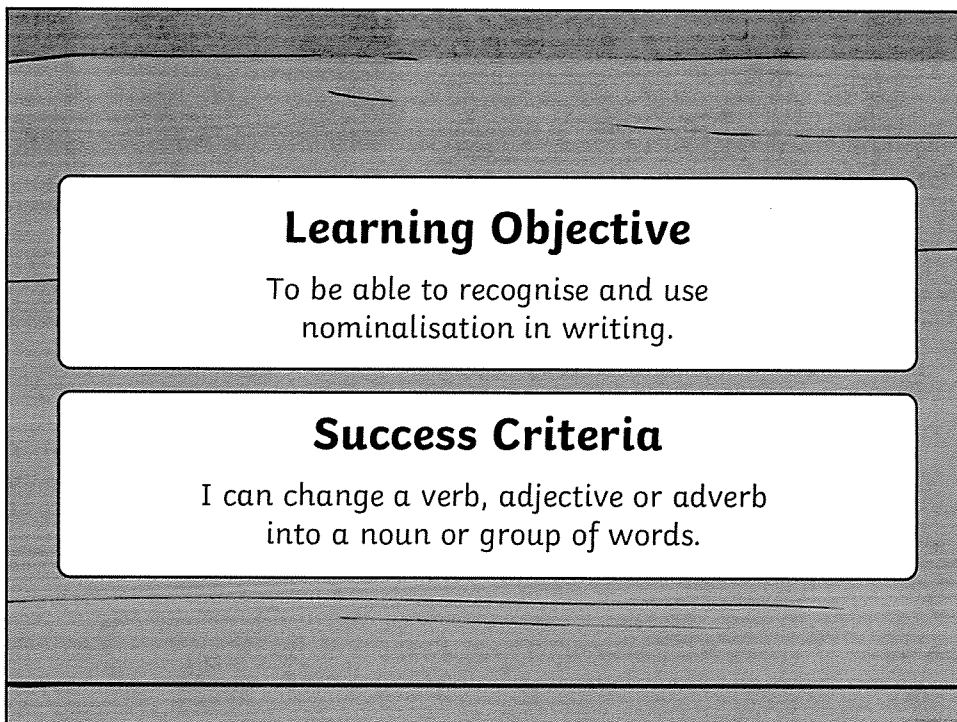

A presentation slide with a dark blue header and a light blue body. The header contains the title 'Nominalisation' in large white font, with the subtitle 'Transforming Words into Nouns' in smaller white font below it. The body contains a white rectangular box with black text. In the bottom right corner of the slide, there is a small circular logo with the word 'twinkl' inside.

# Nominalisation

Transforming Words into Nouns

There are some slide that ask you to complete a task. Please write your answers on the slide.

1

A presentation slide with a dark blue header and a light blue body. It contains two white rectangular boxes. The top box has the title 'Learning Objective' in bold black font, followed by the text 'To be able to recognise and use nominalisation in writing.' The bottom box has the title 'Success Criteria' in bold black font, followed by the text 'I can change a verb, adjective or adverb into a noun or group of words.'

## Learning Objective

To be able to recognise and use nominalisation in writing.

## Success Criteria

I can change a verb, adjective or adverb into a noun or group of words.

2

## Nouns, Verbs, Adjectives and Adverbs

Before we get into nominalisations, let's go over word types you'll need to know:

**Noun** – a person, place or thing

**Adjective** – describes a noun

**Verb** – an action or 'doing' word

**Adverb** – adds detail to a verb

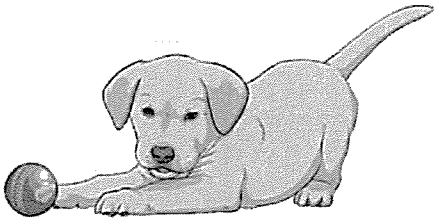

3

## Nouns, Verbs, Adjectives and Adverbs

Can you find the **noun**, **adjective**, **verb** and **adverb** in this sentence?

Label each one in the sentence.

**The energetic puppy excitedly  
raced after the ball.**

4

## Nominalisation

Great, so now you've got your word types under control, let's talk about nominalisation.

Nominalisation occurs when you use a **verb**, **adjective** or **adverb** like a **noun**.

One way of doing this is to add a **suffix** or **ending** to your word. For example:

organise	→	organisation
react	→	reaction

5

## Nominalisation with a Suffix

These words have been nominalised by adding a suffix.

difficult	→	difficulty
move	→	movement
quickly	→	quickness
nominalise	→	nominalisation

6

## Nominalisation by Shortening

Sometimes nominalisation involves shortening a word by removing prefixes or suffixes to find the noun.

beautifully

beauty

driving

drive

7

## Nominalisation by Shortening

Can you simplify these words to find the noun? Write your answer in the box.

comfortable

travelling

enthusiastically

8

## Easy Nominalisations

Some verbs can already be used as a noun so you don't have to do anything to change them.

9

## Challenging Nominalisations

On the other hand, you might need to change groups of words to make a nominalisation.

Oliver was **scared**  
of a spider.

Oliver has a **fear**  
of spiders.

10

## Challenging Nominalisations

On the other hand, you might need to change groups of words to make a nominalisation.

The **graceful** cat.      ➡      The cat acted with **grace**.

Jenny **called** her friend.      ➡      Jenny made a phone **call**.

I understood **completely**.      ➡      I had **complete** understanding.

11

## Nominalisations and Writing

Let's have another look at the sentences we made.

The **graceful** cat.      ➡      The cat acted with **grace**.

Jenny **called** her friend.      ➡      Jenny made a phone **call**.

I understood **completely**.      ➡      I had **complete** understanding.

**Which do you prefer and why?**

**Which would you use in an information report or essay? What about speaking to a friend?**

12

## Nominalisations and Writing

Nominalisations make our writing seem more formal and allow us to talk more about ideas rather than actions. What would you rather tell your teacher?

My **homework** was **late** because  
I was **watching TV**.

**OR**

The **reason** for the late **submission** of  
my **homework** was the **enjoyment**  
of **entertainment**.

13

## Nominalisations and Writing

On the other hand, sometimes connection and action are a good thing in writing. Which sentence would you write to persuade someone?

The **preservation** of the **zoo** is **vital** for **conservation** of  
**species** which are **under threat**.

**OR**

We **must keep** the **zoo** or our **precious**  
**animals** will **quickly become extinct**.

14

**Reflection**

Let's revisit our success criteria. Answer the questions on the slide.

**What is nominalisation?**

**When and why do you think it is used?**

**Can you change a word into a noun or group of words?**

# Nominalisation

## Instructions:

Nominalisation is where you use a verb, adjective or adverb like a noun.

**For example:** I organised my pencil case.

**Nominalised:** The organisation of my pencil case.

Nominalise the underlined words in these sentences. You may need to change or switch words around so that the sentence makes sense.

My friend worked carefully.

---

The storm thundered across the sky.

---

It was a difficult test.

---

The cat moved gracefully.

---

We are travelling to Sydney.

---

The garden grew tremendously.

---

# Nominalisation

I created a painting.

---

Our team won the match.

---

The baby slept peacefully.

---

I included all my friends.

---

We must protect the environment.

---

Scared of spiders.

---

Talking about a game.

---

Handwriting practice lines consisting of 20 horizontal lines.

Have I got/checked?									
Capitals		Sentence		Punctuation		Paragraphs /		Spelling	

1

## Aim

- To add fractions with the same denominator.

## Success Criteria

- I can use a fraction wall or diagram to show the fractions.
- I can add the numerators of two different fractions with the same denominator to find the total.

2

## Funny Fractions

Count up in fraction steps from the given fraction.

Can you match your voice to the Funny Voice Card?

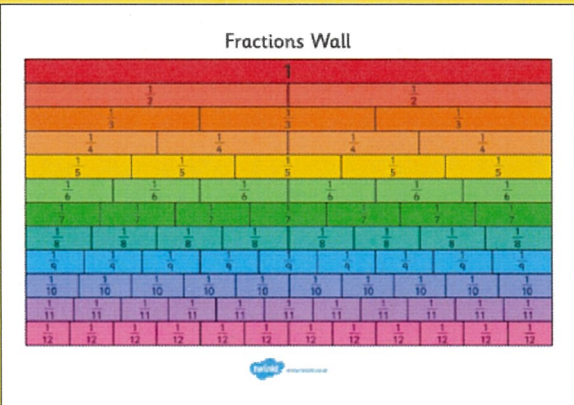

3

## Funny Fractions

Fractions Wall

4

## Pizza

How many slices of pizza does Amelia have?

How many slices of pizza does Kamil have?

How many slices do they have altogether?

5

## Pizza

How many slices do they have altogether?

3 slices    +    2 slices    =    5 slices

6

## Pizza

How would the calculation change if we used fractions instead of slices?

How many slices of pizza does Amelia have?

$\frac{3}{6}$

How many slices of pizza does Kamil have?

$\frac{2}{6}$

What fraction of a pizza do they have altogether?

7

## Pizza

What fraction of a pizza do they have altogether?

$$\frac{3}{6} + \frac{2}{6} = \frac{5}{6}$$

8

## Pizza Fractions

Why do we only add the numerators and not the denominators?  
What fraction of pizza does each calculation show?

**1**

 +  = 

$$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

**2**

 +  = 

$$\frac{2}{8} + \frac{5}{8} = \frac{7}{8}$$

**3**

 +  = 

$$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$$

**4**

 +  = 

$$\frac{3}{10} + \frac{4}{10} = \frac{7}{10}$$

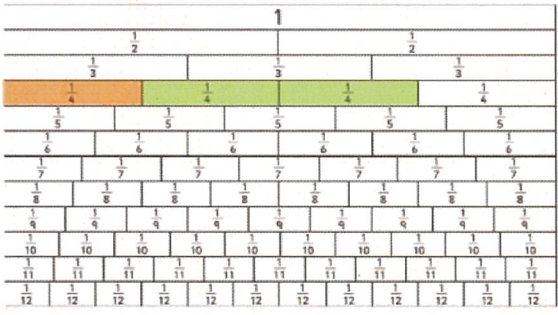

9

## Wall

What do we need to colour in on the fraction wall to show this calculation?

$$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

10

## Wall

Try these:

1  $\frac{4}{6} + \frac{1}{6} = \text{---}$

2  $\frac{5}{10} + \frac{2}{10} = \text{---}$

3  $\frac{3}{7} + \frac{3}{7} = \text{---}$

4  $\frac{2}{12} + \frac{7}{12} + \frac{1}{12} = \text{---}$

11

## And the Question Is...

Complete the fractions to make the answer correct:

$$\frac{\quad}{6} + \frac{\quad}{6} = 1$$

How many different ways can you solve this problem?

How do you know you have found them all?

12

### And the Question Is...

Complete the fractions to make the answer correct:

$$\frac{\quad}{10} + \frac{\quad}{10} = 1$$

How many different ways can you solve this problem?

How do you know you have found them all?

# Adding Fractions

To add fractions with the same denominator.

Colour in the fractions of pizza and use them to help you to add the fractions.

1.  $\frac{1}{3} + \frac{1}{3} =$

5.  $\frac{4}{9} + \frac{3}{9} =$

2.  $\frac{2}{5} + \frac{1}{5} =$

6.  $\frac{2}{6} + \frac{3}{6} =$

3.  $\frac{4}{10} + \frac{2}{10} =$

7.  $\frac{4}{8} + \frac{2}{8} =$

4.  $\frac{3}{7} + \frac{2}{7} =$

8.  $\frac{3}{10} + \frac{5}{10} =$

Can you divide the squares into the correct number of sections to represent the fractions in each calculation?

9.  $\frac{2}{4} + \frac{1}{4} =$

10.  $\frac{3}{8} + \frac{4}{8} =$

# Adding Fractions

To add fractions with the same denominator.

Use a Fraction Wall to help you to add these pairs of fractions.

Can you draw a diagram to show each calculation?

E.g.  $\frac{3}{10} + \frac{2}{10} = \frac{5}{10}$

1.  $\frac{1}{3} + \frac{1}{3} =$

6.  $\frac{2}{6} + \frac{3}{6} =$

2.  $\frac{2}{5} + \frac{1}{5} =$

7.  $\frac{4}{8} + \frac{2}{8} =$

3.  $\frac{4}{10} + \frac{2}{10} =$

8.  $\frac{3}{10} + \frac{5}{10} =$

4.  $\frac{3}{7} + \frac{2}{7} =$

9.  $\frac{2}{4} + \frac{1}{4} =$

5.  $\frac{4}{9} + \frac{3}{9} =$

10.  $\frac{3}{8} + \frac{4}{8} =$

# Adding Fractions

To add fractions with the same denominator.

Use a Fraction Wall to help you to add these pairs of fractions.

1.  $\frac{1}{3} + \frac{1}{3} =$

6.  $\frac{4}{9} + \frac{3}{9} =$

2.  $\frac{2}{5} + \frac{1}{5} =$

7.  $\frac{2}{6} + \frac{3}{6} =$

3.  $\frac{4}{10} + \frac{2}{10} =$

8.  $\frac{4}{8} + \frac{2}{8} =$

4.  $\frac{3}{7} + \frac{2}{7} =$

9.  $\frac{3}{10} + \frac{5}{10} =$

5.  $\frac{4}{9} + \frac{3}{9} =$

10.  $\frac{3}{8} + \frac{4}{8} =$

11. If the answer is  $\frac{3}{7}$ , what could the sum be? How many answers can you find?

12. If the answer is  $\frac{6}{10}$ , what could the sum be? How many answers can you find?

# Adding Fractions

twinkl

1

## Aim

- To add fractions with the same denominator.

## Success Criteria

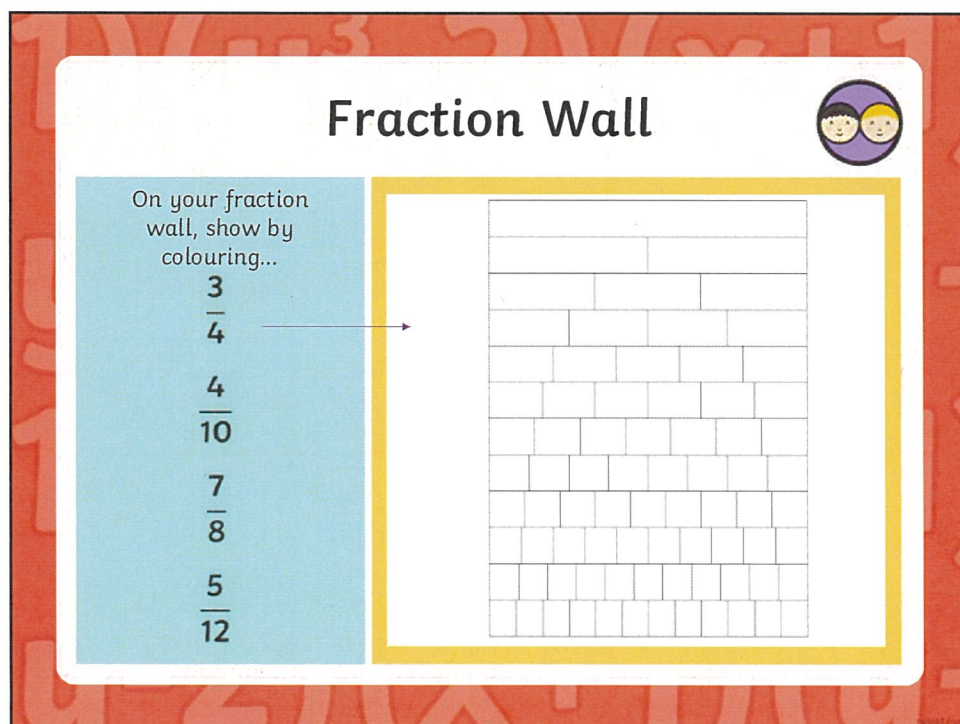

- I can use a fraction bar to represent a fraction.
- I can show two fractions on a fraction bar.
- I can use a fraction bar to find the total of two fractions.

2

3

4

# Fraction Wall

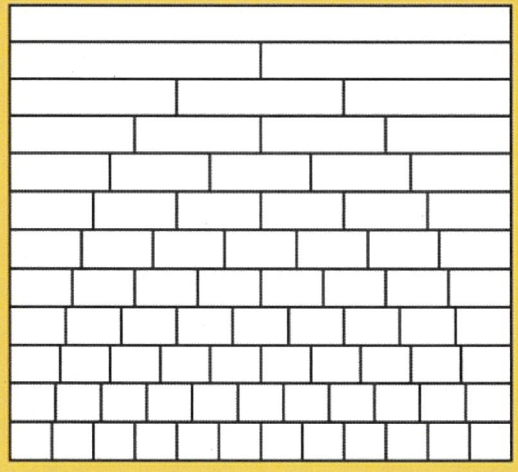

On your fraction wall, colour in  $\frac{2}{6}$ .

On your fraction wall, mark another  $\frac{3}{6}$  with lines.

How many sixths have been coloured in altogether?

$\frac{2}{6} + \frac{3}{6} =$  

5

# Fraction Wall

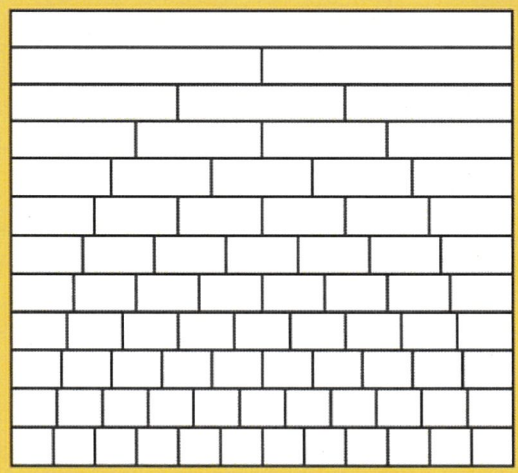

On your fraction wall, colour in  $\frac{5}{12}$ .

On your fraction wall, mark another  $\frac{4}{12}$  with lines.

How many twelfths have been coloured in altogether?

$\frac{5}{12} + \frac{4}{12} =$  

6

# Fraction Wall

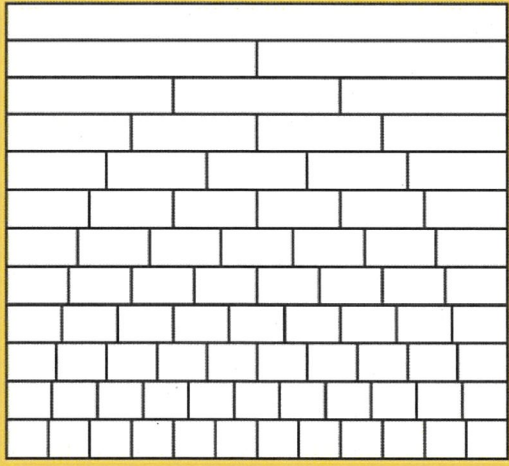

On your fraction wall, colour in  $\frac{3}{10}$ .

On your fraction wall, mark another  $\frac{2}{10}$  with lines.

On your fraction wall, mark another  $\frac{4}{10}$  with dots.

How many tenths have been coloured in altogether?

$\frac{3}{10} + \frac{2}{10} + \frac{4}{10} =$  

7

# Fraction Bars

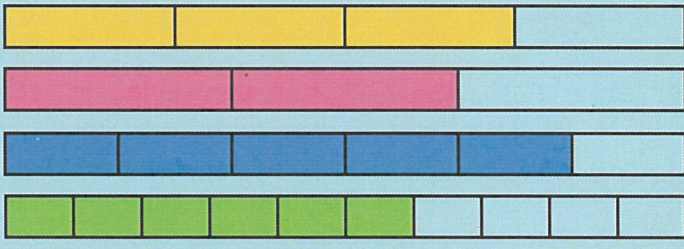

How could this bar be used to show  $\frac{2}{5}$ ?

The bar needs to be split into 5 equal sections to represent fifths.  
2 of the 5 sections need to be coloured in to represent the 2 fifths.

Draw fraction bars to show each of these fractions:

8

## Fraction Bars

Draw a fraction bar to represent  $\frac{3}{8}$ .

Add  $\frac{4}{8}$  so that your fraction bar shows  $\frac{3}{8} + \frac{4}{8}$ .

$$\text{so } \frac{3}{8} + \frac{4}{8} = \frac{7}{8}.$$

Draw fraction bars to solve each of these calculations:

$$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

$$\frac{3}{8} + \frac{3}{8} = \frac{6}{8}$$

$$\frac{4}{6} + \frac{2}{6} = \frac{6}{6} \text{ or } 1$$

What do you notice about the numerators and denominators when you add the fractions?

9

## Beyond the Whole

Draw a fraction bar to calculate  $\frac{3}{4} + \frac{2}{4}$ .

What do we need to do to add  $\frac{2}{4}$ ?

$$\frac{3}{4} + \frac{2}{4} = \frac{5}{4} \text{ or } 1\frac{1}{4}$$

Solve these calculations:

$$\frac{5}{6} + \frac{4}{6} = \frac{9}{6} \text{ or } 1\frac{3}{6}$$

$$\frac{6}{8} + \frac{6}{8} = \frac{12}{8} \text{ or } 1\frac{4}{8}$$

10

# Adding Fractions

To add fractions with the same denominator

Colour in the fraction bars to show these calculations and then give the answers.

1.  $\frac{2}{5} + \frac{1}{5} =$

2.  $\frac{1}{3} + \frac{1}{3} =$

3.  $\frac{4}{8} + \frac{3}{8} =$

4.  $\frac{2}{7} + \frac{3}{7} =$

5.  $\frac{1}{4} + \frac{3}{4} =$   or

6.  $\frac{3}{6} + \frac{1}{6} =$

7.  $\frac{4}{9} + \frac{4}{9} =$

8.  $\frac{2}{10} + \frac{4}{10} + \frac{3}{10} =$

Draw fraction bars to show these calculations and then give the answers.

9.  $\frac{2}{6} + \frac{3}{6} =$

10.  $\frac{5}{10} + \frac{3}{10} =$

11.  $\frac{1}{5} + \frac{3}{5} =$

12.  $\frac{4}{7} + \frac{2}{7} =$

# Adding Fractions

To add fractions with the same denominator

Colour in the fraction bars to show these calculations and then give the answers.

1.  $\frac{2}{7} + \frac{3}{7} =$

2.  $\frac{2}{10} + \frac{4}{10} + \frac{3}{10} =$

3.  $\frac{5}{6} + \frac{3}{6} =$   or

4.  $\frac{6}{8} + \frac{3}{8} =$   or

Draw fraction bars to show these calculations and then give the answers.

5.  $\frac{2}{6} + \frac{3}{6} =$

6.  $\frac{3}{5} + \frac{4}{5} =$   or

7.  $\frac{2}{4} + \frac{3}{4} =$   or

Draw fraction bars to show these calculations and then give the answers.

8.  $\frac{5}{10} + \frac{3}{10} =$

9.  $\frac{4}{6} + \frac{5}{6} =$   or

10.  $\frac{5}{9} + \frac{7}{9} =$   or

11.  $\frac{5}{8} + \frac{7}{8} =$   or

12.  $\frac{2}{3} + \frac{3}{3} + \frac{2}{3} =$   or

# Adding Fractions

To add fractions with the same denominator

Draw fraction bars to show these calculations. Give the answer as improper fractions and as mixed numbers where possible.

1.  $\frac{2}{7} + \frac{3}{7} =$

2.  $\frac{2}{10} + \frac{4}{10} + \frac{3}{10} =$

3.  $\frac{5}{6} + \frac{3}{6} =$   or

4.  $\frac{6}{8} + \frac{3}{8} =$   or

5.  $\frac{2}{6} + \frac{3}{6} =$

6.  $\frac{3}{5} + \frac{4}{5} =$   or

7.  $\frac{2}{4} + \frac{3}{4} =$   or

8.  $\frac{5}{10} + \frac{3}{10} =$

9.  $\frac{4}{6} + \frac{5}{6} =$   or

10.  $\frac{5}{9} + \frac{7}{9} =$   or

11.  $\frac{5}{8} + \frac{7}{8} =$   or

12.  $\frac{2}{3} + \frac{3}{3} = \frac{2}{3} =$

1

### Aim

- To subtract fractions with the same denominator.

### Success Criteria

- I can count back on a number line to subtract fractions.
- I can subtract the numbers in the numerators to find the answer.

2

### Four in a Row

- 1 Get into two teams.
- 2 Take turns to give an equivalent fraction for one of the fractions on the grid.
- 3 If you give a correct equivalent fraction, your team claims the square.
- 4 The first team to get four in a row wins!

3

### Four in a Row

$\frac{1}{4}$	$\frac{1}{10}$	$\frac{3}{5}$	$\frac{1}{9}$
$\frac{2}{3}$	$\frac{1}{2}$	$\frac{1}{8}$	$\frac{4}{10}$
$\frac{4}{8}$	$\frac{3}{9}$	$\frac{1}{3}$	$\frac{3}{4}$
1	$\frac{1}{6}$	$\frac{4}{6}$	$\frac{1}{5}$

4

## Fraction Blocks

What type of fraction is shown by the fraction block?

What addition calculations could the fraction block represent?

$$\frac{4}{10} + \frac{6}{10} = \frac{10}{10}$$

$$\frac{6}{10} + \frac{4}{10} = \frac{10}{10}$$

What subtraction calculations could the fraction block represent?

$$\frac{10}{10} - \frac{6}{10} = \frac{4}{10}$$

$$\frac{10}{10} - \frac{4}{10} = \frac{6}{10}$$

What do you notice about the numerators?

What do you notice about the denominators?

5

## Number Lines

We can also show this subtraction on a number line.

$$\frac{10}{10} - \frac{6}{10} = \frac{4}{10}$$

What would the number line for  $\frac{10}{10} - \frac{4}{10}$  look like?

6

## Number Lines

$$\frac{5}{6} - \frac{3}{6} = \frac{2}{6}$$

How many parts should this number line have altogether?

Where should I start?

How many jumps do I need to make?

What's the answer?

7

## More Number Lines

How many parts will the number line need?

Where should I start?

How many jumps do I need to make?

What is the answer?

$$\frac{8}{10} - \frac{5}{10} = \text{---}$$

$$\frac{7}{8} - \frac{3}{8} = \text{---}$$

$$\frac{4}{5} - \frac{2}{5} = \text{---}$$

8

Draw your number lines here.

9

## Equivalent Answers

Look at the answers to these fraction subtractions:

$$\frac{7}{8} - \frac{3}{8} = \frac{4}{8}$$

$$\frac{5}{6} - \frac{3}{6} = \frac{2}{6}$$

$$\frac{11}{12} - \frac{2}{12} = \frac{9}{12}$$

$\frac{4}{8}$  is the same as  $\frac{1}{2}$

$\frac{2}{6}$  is the same as  $\frac{1}{3}$

$\frac{9}{12}$  is the same as  $\frac{3}{4}$

Can you explain how we know they are the same fraction using our times tables?

10

**Inverse It!**

$\frac{2}{6} + \frac{3}{6} = \text{---}$	$\frac{5}{6} - \frac{3}{6} = \text{---}$	$\frac{5}{6} - \frac{2}{6} = \text{---}$
$\frac{6}{10} + \frac{3}{10} = \text{---}$	$\frac{9}{10} - \frac{3}{10} = \text{---}$	$\frac{9}{10} - \frac{6}{10} = \text{---}$
$\frac{3}{8} + \frac{3}{8} = \text{---}$	$\frac{6}{8} - \frac{3}{8} = \text{---}$	
$\frac{3}{7} + \frac{2}{7} = \text{---}$	$\frac{5}{7} - \frac{2}{7} = \text{---}$	$\frac{5}{7} - \frac{3}{7} = \text{---}$
$\frac{4}{9} + \frac{5}{9} = \text{---} =$	$\frac{9}{9} - \frac{5}{9} = \text{---}$	$\frac{9}{9} - \frac{4}{9} = \text{---}$

# Subtracting Fractions Match Up

To subtract fractions with the same denominator.

Match each butterfly to the correct flower by subtracting the fractions. Use different colours to show each pair.

1.  $\frac{9}{12} - \frac{6}{12} = \square$	2.  $\frac{9}{10} - \frac{4}{10} = \square$	3.  $\frac{12}{14} - \frac{5}{14} = \square$	4.  $\frac{15}{20} - \frac{6}{20} = \square$
5.  $\frac{5}{7} - \frac{2}{7} = \square$	6.  $\frac{6}{8} - \frac{4}{8} = \square$	7.  $\frac{14}{16} - \frac{8}{16} = \square$	8.  $\frac{8}{9} - \frac{4}{9} = \square$

			
$\frac{7}{14}$	$\frac{4}{7}$	$\frac{3}{12}$	$\frac{4}{9}$
			
$\frac{5}{10}$	$\frac{9}{20}$	$\frac{2}{8}$	$\frac{6}{16}$

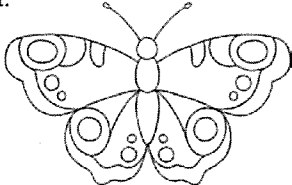

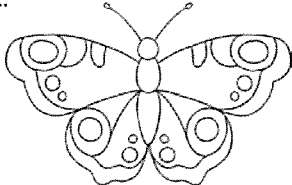

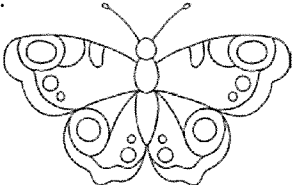

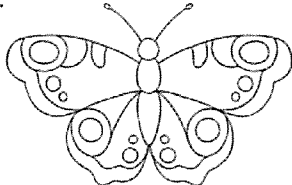

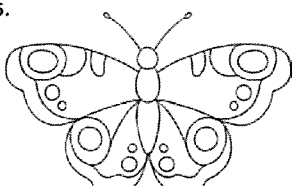

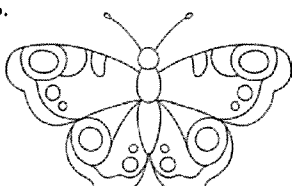

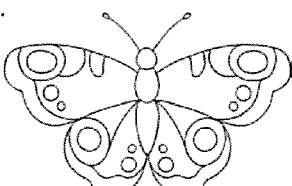

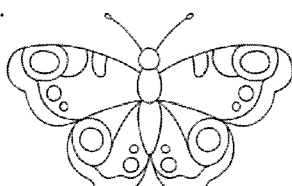

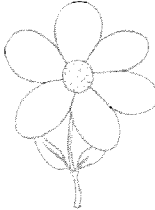

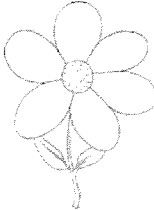

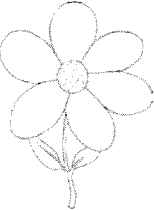

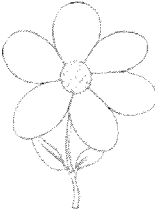

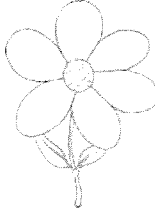

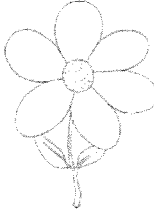

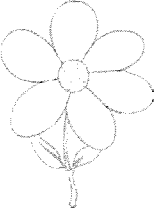

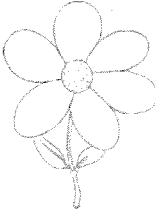

# Subtracting Fractions Match Up

To subtract fractions with the same denominator.

Match each butterfly to the correct flower by subtracting the fractions. Use different colours to show each pair.

1.  $\frac{11}{12} - \frac{3}{12} - \frac{4}{12} = \square$	2.  $\frac{9}{10} - \frac{4}{10} - \frac{2}{10} = \square$	3.  $\frac{13}{14} - \frac{4}{14} - \frac{7}{14} = \square$	4.  $\frac{17}{20} - \frac{5}{20} - \frac{8}{20} = \square$
5.  $\frac{6}{7} - \frac{2}{7} - \frac{1}{7} = \square$	6.  $\frac{7}{8} - \frac{4}{8} - \frac{1}{8} = \square$	7.  $\frac{14}{16} - \frac{3}{16} - \frac{7}{16} = \square$	8.  $\frac{8}{9} - \frac{4}{9} - \frac{2}{9} = \square$

			
$\frac{4}{20}$	$\frac{2}{8}$	$\frac{3}{10}$	$\frac{4}{16}$
			
$\frac{2}{14}$	$\frac{2}{9}$	$\frac{3}{7}$	$\frac{4}{12}$

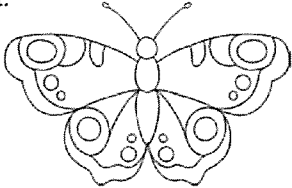

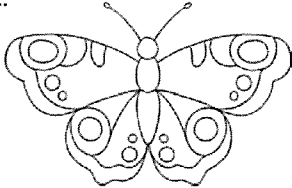

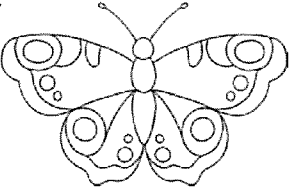

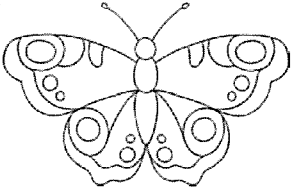

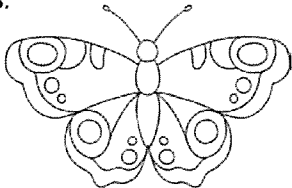

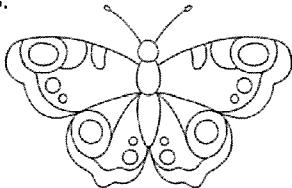

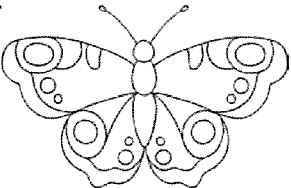

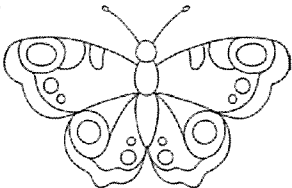

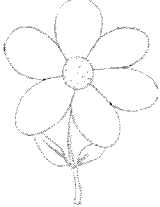

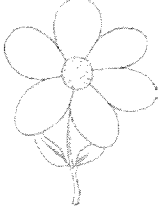

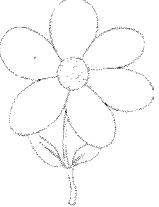

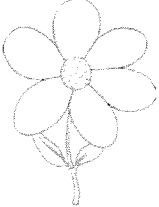

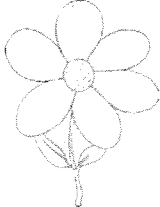

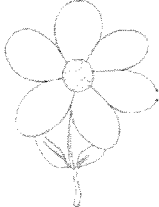

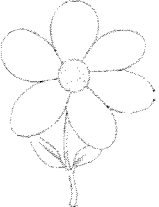

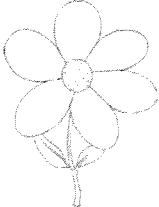

# Subtracting Fractions Match Up

To subtract fractions with the same denominator.

Match each butterfly to the correct flower by subtracting the fractions. Use different colours to show each pair. You will need to simplify the fractions to find the answers.

1.  $\frac{11}{12} - \frac{3}{12} - \frac{4}{12} = \square = \square$	2.  $\frac{9}{10} - \frac{4}{10} - \frac{1}{10} = \square = \square$	3.  $\frac{13}{14} - \frac{4}{14} - \frac{7}{14} = \square = \square$	4.  $\frac{17}{20} - \frac{5}{20} - \frac{8}{20} = \square = \square$
5.  $\frac{18}{21} - \frac{6}{21} - \frac{3}{21} = \square = \square$	6.  $\frac{7}{8} - \frac{2}{8} - \frac{1}{8} = \square = \square$	7.  $\frac{14}{16} - \frac{3}{16} - \frac{7}{16} = \square = \square$	8.  $\frac{16}{18} - \frac{8}{18} - \frac{4}{18} = \square = \square$

			
$\frac{2}{5}$	$\frac{1}{4}$	$\frac{1}{5}$	$\frac{1}{2}$
			
$\frac{1}{3}$	$\frac{3}{7}$	$\frac{2}{9}$	$\frac{1}{7}$

1

## Aim

- To subtract fractions with the same denominator.

## Success Criteria

- I can use a fraction bar to represent a fraction.
- I can use a fraction bar to subtract fractions.
- I can subtract fractions by subtracting the numerators.

2

## Making Whole Numbers

<b>Start</b>	<small>I have</small>	<small>I have</small>	<small>What must be added to</small>	<small>I have</small>	<small>What must be added to</small>
	$\frac{1}{10}$	$\frac{8}{19}$	$\frac{5}{9}$ <small>to make a whole?</small>	$\frac{4}{9}$	$\frac{2}{3}$ <small>to make a whole?</small>
	<small>I have</small>	<small>I have</small>	<small>I have</small>	<small>I have</small>	<small>What must be added to</small>
	$\frac{1}{2}$	$\frac{13}{20}$	$\frac{1}{3}$	$\frac{9}{11}$ <small>to make a whole?</small>	$\frac{2}{11}$
					$\frac{5}{7}$ <small>to make a whole?</small>

3

## Fraction Bars

How many equal pieces does the bar need to be divided into to represent  $\frac{5}{6}$ ?

How many of the pieces need to be coloured in to represent  $\frac{5}{6}$ ?

Draw fraction bars to show each of these fractions:

$\frac{3}{4}$

$\frac{6}{10}$

$\frac{2}{5}$

4

## Fraction Bars

The bar needs to represent  $\frac{8}{5}$ . How many equal pieces does the bar need to be divided into to represent fifths?

How many of the pieces need to be coloured in to represent  $\frac{8}{5}$ ?

If we don't have enough fifths to be able to colour in 8 of them, what do we need to do?

How many more fifths do we need to colour in?

5

## Fraction Bars

Draw fraction bars to represent:

6

## Subtracting Fractions

How could you show  $\frac{7}{8} - \frac{4}{8}$  using a fraction bar?

How many of the equal pieces need to be coloured in?

How many of the pieces need to be taken away?

How many eighths are left?

$$\frac{7}{8} - \frac{4}{8} = \frac{3}{8}$$

7

## Subtracting Fractions

Draw fraction bars to subtract:

$$\frac{5}{6} - \frac{3}{6} =$$

$$\frac{6}{10} - \frac{2}{10} =$$

$$\frac{5}{7} - \frac{4}{7} =$$

What do you notice about the numerator and denominator in each subtraction?

8

Cut out the jigsaw pieces.

# Subtracting Fractions Jigsaw

1. Use the fraction bars to help you to solve the subtraction calculations and then match the calculations with their answers to put the jigsaw together.
2. Draw your own fraction bars to solve the calculations around the edge.
3. Can you write your own calculations for the answers around the edge?

Choose the fraction bar to match each subtraction and use them to help you to work out the answers.

## Subtracting Fraction Multiples

twinkl

1

### Aim

- I can subtract fractions with denominators that are multiples of the same number.

### Success Criteria

- I can subtract fractions with the same denominator.
- I can convert between improper and mixed number fractions.
- I can use multiplication to change a fraction into an equivalent.
- I can subtract fractions with denominators that are multiples of the same number.

2

## Kangaroo Fractions

Click on Kylie Kangaroo and write the fraction she jumps to as an improper fraction and a mixed number.

0                      1                       $1\frac{2}{5}$                       2

$\frac{7}{5}$

3

## Kangaroo Fractions

Click on Kylie Kangaroo and write the fraction she jumps to as an improper fraction and a mixed number.

2                       $2\frac{3}{4}$                       3                      4

$\frac{11}{4}$

4

## Kangaroo Fractions

Click on Kylie Kangaroo and write the fraction she jumps to as an improper fraction and a mixed number.

4      5       $5\frac{2}{3}$       6

$\frac{17}{3}$

5

## Same Denominators

In this fraction subtraction, both the fractions have the **same denominator**.

$\frac{3}{5} - \frac{1}{5} = \frac{2}{5}$

To solve the calculation, the **denominator** stays the **same**, and the **numerators** are subtracted.

6

### Same Denominators

In this fraction subtraction, both the fractions have the **same denominator**.

$$\frac{10}{3} - \frac{2}{3} = \frac{8}{3} = 2\frac{2}{3}$$

1	4	7
2	5	8
3	6	

This answer is an improper fraction. Every whole is made of three parts.

This is the same answer written as a mixed number.

7

### Same Denominators

In this fraction subtraction, both the fractions have the **same denominator**.

$$2\frac{3}{4} - \frac{5}{4} = \frac{6}{4} = 1\frac{1}{2}$$

1	5	9
2	6	10
3	7	11
4	8	

This is a mixed number. Change it to an improper fraction before calculating.

This answer is an improper fraction. Change it to a mixed number.

This answer can be simplified.

8

## Denominator Multiples

In this fraction subtraction, both the fractions have **different denominators** which are multiples of the same number.

$\times 2 = 10$

$$\frac{5}{3} - \frac{7}{6}$$

$\times 2 = 6$

To solve the calculation, we use **multiplication** to change the fraction with the lowest denominator into an **equivalent fraction** with the same denominator as the other fraction.

**Remember to do the same multiplication to the numerator.**

9

## Denominator Multiples

Now we have a calculation where both the denominators are the same number.

$\times 2 = 10$

$$\frac{5}{3} - \frac{7}{6} = \frac{10}{6} - \frac{7}{6} = \frac{3}{6} = \frac{1}{2}$$

$\times 2 = 6$

To solve the calculation, the **denominator stays the same**, and the **numerators are subtracted**.

10

## Denominator Multiples

Let's try this with another calculation where the fractions have **different denominators** which are multiples of the same number.

$\times 3 = 9$

$$\frac{3}{4} - \frac{7}{12} = \frac{9}{12} - \frac{7}{12} = \frac{2}{12} = \frac{1}{6}$$

$\times 3 = 12$

11

## Denominator Multiples

Let's try this with another calculation where the fractions have **different denominators** which are multiples of the same number.

$\times 5 = 25$

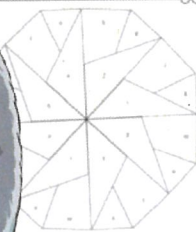

$$\frac{5}{2} - \frac{3}{10} = \frac{25}{10} - \frac{3}{10} = \frac{22}{10} = 2\frac{1}{5}$$

$\times 5 = 10$

12

# Colour by Fraction

**Subtracting Fractions Stained Glass Designs**

Use subtraction fractions with denominators that are multiples of the same number.

For answers to these calculations use:

- between 1 and 1/2
- greater than 1/2

Use 1/2 of the stained glass design based on your answers.

Question	Answer	Size
$\frac{7}{8} - \frac{1}{2} =$		
$\frac{13}{8} - \frac{3}{4} =$		
$\frac{10}{6} - \frac{1}{2} =$		
$\frac{13}{6} - \frac{3}{4} =$		
$\frac{7}{10} - \frac{3}{5} =$		
$\frac{6}{3} - \frac{2}{15} =$		
$\frac{33}{20} - \frac{2}{5} =$		
$\frac{18}{9} - \frac{1}{3} =$		

Use for your stained glass design:

- ☐ less than 1/2
- ☐ between 1/2 and 1
- ☐ between 1 and 1 1/2
- ☐ greater than 1 1/2

13

# Prove It

Is this calculation correct? Prove it!

$$2\frac{6}{10} - \frac{4}{5} = 1\frac{4}{5}$$

$$\frac{26}{10} - \frac{8}{10} = \frac{18}{10} = 1\frac{8}{10} = 1\frac{4}{5}$$

14

**Prove It**

Is this calculation correct? Prove it!

$$2\frac{5}{6} - \frac{2}{3} = 1\frac{4}{6} \quad \text{X}$$

$$\frac{17}{6} - \frac{4}{6} = \frac{13}{6} = 2\frac{1}{6}$$

15

**Prove It**

Is this calculation correct? Prove it!

$$2\frac{5}{9} - \frac{2}{3} = 1\frac{5}{9} \quad \text{X}$$

$$\frac{23}{9} - \frac{6}{9} = \frac{17}{9} = 1\frac{8}{9}$$

16

**Prove It**

Is this calculation correct? Prove it!

$3\frac{2}{8} - \frac{3}{4} = 2\frac{1}{2}$  ✓

$\frac{26}{8} - \frac{6}{8} = \frac{20}{8} = 2\frac{4}{8} = 2\frac{1}{2}$

# Subtracting Fractions

## Stained Glass Designs

I can subtract fractions with denominators that are multiples of the same number.

Choose the four colours for your stained-glass design:

☐

Less than  $\frac{1}{2}$

☐

Between  $\frac{1}{2}$  and 1

☐

Between 1 and  $1\frac{1}{2}$

☐

Greater than  $1\frac{1}{2}$

## WK 10 Science with Mrs Watt

Hello everyone,

I hope you are all going well. I am missing seeing you! For the last week, I have set another Whole School Engineering Challenge and some other hands on fun with an experiment and/or food design.

### **Engineering Challenge 2: Build a bridge**

The aim is to build a bridge that spans 50cm over a pretend river. The bridge can be built out of whatever you have at home. Some ideas are; Duplo, Lego, blocks, cardboard, skewers, paddle pop sticks, sticky tape etc. To test how strong your bridge is, you need to see how much weight it can handle (it's load bearing capacity). To test this, put books on your bridge one at a time and see how many it can hold before it breaks!

Remember take a photo of your bridge with you in it to and email it to [janet.watt@det.nsw.edu.au](mailto:janet.watt@det.nsw.edu.au)

For those of you that love experiments try the “How to Grow a Rainbow Science Experiment”

For those of you who like cooking and creating, why not cook or prepare some food with a space theme.

Kind Regards, Mrs Watt 😊

# How to Grow a Rainbow

## Science Experiment

Did you know that you can grow your own rainbow?

You will need a scientific process called the **capillary action**. This action happens when a liquid moves up through a hollow tube or into a spongy, solid material. It happens when three forces work together: **cohesion**, **adhesion** and **surface tension**.

Water molecules like to stick to each other - this is called **cohesion**. They also like to stick to solids in a process called **adhesion**.

In this experiment, you are going to use kitchen roll. The fibres in kitchen roll have lots of little holes. Water is **absorbed** through the kitchen roll because when the first water molecule **adheres** to it and begins to move upward, it pulls the next water molecule up with it, like a chain.

### Words To Learn:

- capillary action
- adhesion
- cohesion
- absorbed

### You will need:

- Kitchen roll/paper towel
- Felt-tip pens
- Two small bowls of water
- Paperclip
- Thread

### What To Do:

1. Cut the kitchen roll into the shape of a rainbow.
2. At each end, use the felt-tip pens to colour a rainbow about 2cm up from the bottom. Remember the order of the colours: red, orange, yellow, green, blue, indigo, violet.
3. Attach the paperclip to the top of the rainbow and tie a piece of thread to it. This will allow you to hold your rainbow.
4. Add water to the two bowls.
5. Hold the rainbow with both ends slightly submerged into each bowl of water and watch your rainbow grow.
